

Edit manifest (ID: 019806fe-aa6d-35f7-750b-44c89e60c95a)

Understanding Manifests

A Manifest (farcaster.json) is required to register your Mini App and bind it to your domain. Think of it as DNS for your Mini App - it tells Farcaster clients about your app's name, icon, functionality, and enables deep integrations with the Farcaster ecosystem.

Domain

mesticker-app.vercel.app/

App Identity & Store Presence

App Name

name

Cartoon Network

App Icon

iconUrl

https://https://mesticker-app.vercel.app/icon.png

Subtitle

subtitle

Cartoonify Yourself!

Description

description

Turn images into classic 90's and 00's cartoons

## Next Step: Configure Redirect

Set your server to temporarily redirect (307) requests for `/.well-known/farcaster.json` to the following Farcaster Hosted Manifest URL:

`https://api.farcaster.xyz/miniapps/hosted-manifest/019806fe-aa6d-35f7-750b-44c89e60c95a`

Most web frameworks support setting up redirects. Here are some common ones:

- [Next.js](#)
- [Express](#)
- [Hono](#)
- [Remix](#)
- **Vercel (Generate `vercel.json`)** <> ([Vercel redirect docs](#))

## Manifest JSON

```
{
  "frame": {
    "name": "Cartoon Network",
    "version": "1",
    "iconUrl": "https://https://mesticker-app.vercel.app/",
    "homeUrl": "https://https://mesticker-app.vercel.app/",
    "imageUrl": "https://mesticker-app.vercel.app/image.",
    "splashImageUrl": "https://https://mesticker-app.vercel.app/image.",
    "splashBackgroundColor": "#FFFFFF",
    "webhookUrl": "https://https://mesticker-app.vercel.app/webhook",
    "subtitle": "Cartoonify Yourself!",
    "description": "Turn images into classic 90's and 00's",
    "primaryCategory": "entertainment",
    "tags": [
      "ai",
      "cartoon"
    ]
  },
  "accountAssociation": {
    "header": "",
    "payload": "",
